## ABOUT

---

Hi! I'm Thais, a **developer with more than 8 years of experience** in a wide range of disciplines. Currently I'm working with **Angular 10 and React JS**.

My journey as a developer began in 2012 when I started studying in Senac. This has helped me to widen my range of knowledge and gather experience through several disciplines, such as **front-end, back-end, mobile apps, design, project management, and many more**.

Since the beginning of my career as a developer, I **have been working with up to date technologies, looking for high quality projects through clean code**. Always thinking about a great user experience.
